Maintenance Guide Description

Hand-brushed plated aluminium is sealed with a protective matte coating that preserves its soft sheen and quiet variations in texture. To maintain the beauty of your light, simply dust or wipe the surface with a soft cloth, using a little water only when necessary and always drying immediately afterwards. Abrasive cloths, brushes, solvents or strong detergents should be avoided, as they may damage the delicate brushed finish and its protective layer. The subtle variations in tone are intentional, a natural result of the hand-brushing process, and are not meant to be polished away. Always switch off and unplug the lamp before cleaning, and avoid exposing it to excessive humidity or direct contact with water. With gentle care, the surface will retain its richness and timeless character, carrying the traces of craftsmanship that make each piece unique.

Materials Description

Hand-brushed plated aluminium reflects the meeting of craftsmanship and time. Each piece is plated and then brushed by hand, creating subtle variations in tone and texture that make every object unique. A final matte coating softens the sheen into a silky finish, enhancing the surface with quiet movement and depth.
