Sculpt Stool - Concrete

Designed by

Kristian Sofus Hansen &
Tommy Hyldahl

Sculpt Stool - Concrete

Product Description

The design of the Sculpt stool is inspired by the Brutalist architecture that emerged in the 1950s - true to the concrete building components and simplified block-like structure of the movement, the stool is cast in lightweight fiber concrete and hand painted creating a unique texture of the surface.

The Sculpt cushion can be purchased for increased comfort without compromising the stool's bold, artistic presence.

With its sculptural silhouette and textured surface, the Sculpt Stool makes a striking statement whether placed in the living room as extra seating, styled in the hallway as a functional accent, or used as a bedside or side table. Its Brutalist-inspired form adds architectural depth to any space.

Designer Description

Tommy Hyldahl and Kristian Sofus Hansen intertwine their distinct sensibilities to create designs where storytelling, materiality, and timeless form meet in quiet harmony.

With a background in fashion, Tommy brings an intuitive eye for trends, colors, and textures. His process is one of layering histories, blending details and references from past design periods and reimagining them into something fresh and contemporary. Each collection unfolds as a narrative, evolving from concept to creation, with every element contributing to a greater story.

Kristian, who has lived and studied in Japan, seeks to unite Japanese aesthetics with Danish design, creating a characteristic twist on simplicity itself. His work is defined by the search for subtle, original details that elevate each piece with a unique signature. Drawing inspiration from art and sculpture, his creative process unfolds in new and exciting ways, always striving to craft designs that are both functional and timeless.

Together, they craft design that transcends time, poetic yet practical, expressive yet enduring.

Fire Test Foam	N/A	NF P92-507 - Class M1

Sculpt Stool - Concrete

Family Description Text

The Sculpt Collection is born from the Brutalist architecture of the 1950s, where concrete forms and monolithic geometry defined a new aesthetic language. Reimagined through a contemporary lens, the collection becomes a study in contrast and harmony.

One piece is draped in upholstery, its sharp geometry softened into comfort, an inviting balance of resilience and rest. Another, cast in fiber concrete and hand-painted, speaks with the raw authority of stone yet moves with surprising ease. It may stand alone as a sculptural statement or be paired with a separately available semi-aniline leather cushion, its supple surface adding both comfort and an elegant counterpoint to the rawness beneath.

Together, the Sculpt Collection embodies a dialogue between softness and solidity, warmth and rawness, the intimate and the monumental, two worlds converging in one sculptural expression.

Color Description

Concrete is a cool, mid-grey tone with subtle natural variation, enhanced by a hand-painted finish. The artisanal brushwork softens the surface, adding depth and movement that recall the texture of raw stone. Timeless and versatile, this shade embodies an industrial elegance with a crafted touch, adapting seamlessly to both modern and classic settings.

Maintenance Guide Description

Hand-painted fiber concrete is strong and resilient, yet its artisanal finish requires thoughtful care. Dust surfaces regularly with a soft cloth, and for routine cleaning, use a damp cloth with mild, pH-neutral soap, then dry thoroughly. Avoid abrasive pads, solvents, or acidic and alkaline cleaners, as these can damage the hand-painted layer.

Always protect surfaces with coasters, mats, or felt pads to prevent scratches, stains, and heat marks. Wipe spills immediately to reduce the risk of absorption, and avoid prolonged exposure to standing water. To preserve its finish, keep furniture away from direct sunlight, high humidity, and extreme temperature changes.

With simple, mindful care, hand-painted fiber concrete furniture will maintain its unique character, depth, and elegance for years to come.

Materials Description

Hand-painted fiber concrete combines strength with artistry, transforming an industrial material into a refined surface for pieces that enrich the home. Reinforced with fibers for durability, it offers resilience against everyday use while remaining lightweight and versatile. Each piece is painted by hand, creating subtle variations in tone and texture that make every surface unique.

The result is a finish that balances raw honesty with crafted detail, bringing depth, character, and individuality to contemporary interiors.
