Spectrum, Brandy Leather - 30155

Dimensions

Width	530 mm
Height	30 mm
Depth	330 mm

Responsibility

At Brdr. Krüger, sustainable product lifecycle considerations are at the heart of everything we do with focus on benefits for the environment, workers, and end-users. We source high-quality materials from certified sustainable forest management. The manufacturing processes run on low-emission hydropower and waste-to-energy solutions, achieving a near carbon-neutral effect and minimizing our reliance on fossil fuels. Our commitment to traditional craftsmanship and durable design ensures that our furniture is not only timeless but also built to last, contributing to sustainability for future generations.

Test and Certification

The SPECTRUM® leather features a protective finish that resists stains and light exposure, while the discreet non-slip backing ensures the cushion stays perfectly positioned. Sustainably minded and health-conscious, the leather we source is OEKO-TEX® certified and holds the Blue Angel Ecolabel, ensuring a PFAS-free addition combining heritage with the environment.

Meeting Regulations

Worker safety is a high priority, with all processes conducted under controlled conditions in accordance with unions and national regulations.

Maintenance

Please see our Maintenance & Care instructions at www.brdr-kruger.com/maintenance/

Variants

The Cushion is offered in canvas upholstery and brandy leather, providing both comfort and durability.

Materials, Process and Finishing

Raw hides are a natural, circular material that's a by-product of the meat and dairy industry. Through upcycling, they are upgraded into high quality leather for further use. In doing so, waste is reduced through recycling and reusing. If raw hides weren't transformed into leather, they would have to be disposed of by burying or burning, which would have a negative impact on the environment.

Craftsmanship Statement

We support and foster the Danish cultural heritage of craftsmanship by preserving and advancing the traditional techniques nurtured in our family workshop since 1886. This commitment reflects both the preservation of the craft and its evolution through the integration of new techniques, innovation, and design development.

Compatibility

The Cushion is compatible with the HB Stool.

Description

The handcrafted cushions, custom-contoured for the HB Stool by Hans Bølling, offer comfort and durability, providing extra comfort to the chair's seating. Crafted from SPECTRUM® leather by Danish Sørensen, a premium semi-aniline leather celebrated for its soft, matte finish and natural full-grain texture, the cushions provide a tactile experience that only improves with age. The appearance may vary slightly due to the use of natural materials.
